

# HOW TO USE NABTRADE'S MARKETS TODAY PAGE

## *video transcript*

When you first log into nabtrade you'll arrive at the default Markets Today page.

This page provides you with a snap shot, in real-time, of what's happening in the current market.

### **1. Latest news and articles**

This section provides you with the latest news and articles from Australia and around the world.

### **2. Market status indicator**

At pre-open or before the market opens, you'll be able to see a futures quote in the top panel.

This panel will also let you know what markets are open.

### **3. Australian & Global indices**

These tabs show the performance of the Australian & Global Indices.

Hover over the analysis link for a daily overview of the All Ordinaries performance for that day.

### **4. Sectors Heat map**

Below, you can find a heat map by each sector. Green shows sectors performing well and red shows what is not performing well.

This map can be expanded by clicking on expanded heat map.

### **5. Market snapshot**

Further down the page, you can find a list of top 20 stocks. By default, this list shows top percentage rises however, you can select from other categories to filter the list based on your preference.

### **6. Recent rating changes**

Below that, is a snapshot of recent changes in ratings from our research providers.
